Task + grid diagnostics
Scenario E violations / KPI targets
Planner
parse diagnostics → structured repair plan
Coder
AST-based controller patches
Executor — sandbox
syntax check + unit tests
(subprocess: 60 s, 512 MB)
tests pass?
repeat ≤ 3
Repair Agent
propose patch from failure
Verifier
full-sim before ↔ after metrics:
physics · service · grid
(violations resolved, KPIs not regressed)
violations resolved?
